A Zone of a Peaceful Yet Rebellion and Open-End chain of events for this 2012 spring-summer-fall.

This zone is for people working against the governments **involved in wars** and/or **producing weapons** sent to such war zones.

For us the time is now to speak up against such govemnets as of isreal, iranin and germany, as those governments are preparing thier people to another war. Also, we can no more tolerate any profit making out of production of weapons and heance if and when such weapons are still produced we demand all such profit being completely (100%) taxed.

This is a european effort and such zones should be created everywhere! For being european the location in the city should be defined where international activity appears. The location can be defined by a triangle, such that each apex is a complementary one (eg. 1. park 2. for attraction for people and 3. as operational).

In Berlin on the TKM triangle:
